#### **DETAILED ACTION**

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

### Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

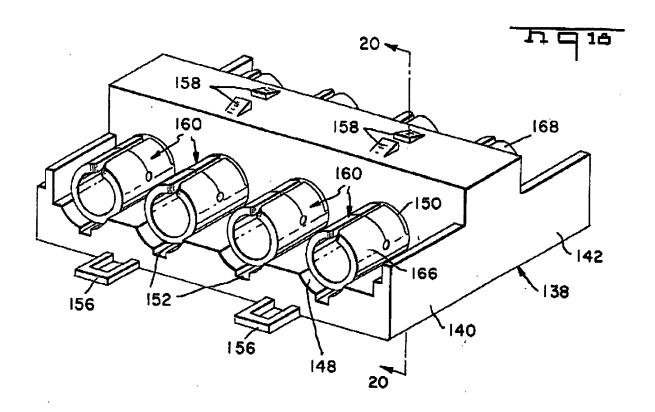

Claims 4-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Hopkins et al. (US 4,010,996). Hopkins is considered to disclose the claimed invention comprising:

a terminal block **138** disposed within the laundry dryer control panel, the terminal block having a lower part **140** and an upper part **142**;

a wall extending from the terminal block lower part and the terminal block upper part (please see figure 18 reproduced below wherein the raised portion surrounding reference character 166 and above reference character 142 is considered to anticipate the claimed wall because both extend from a terminal upper and lower part respectively);

Application/Control Number: 10/663,995

Art Unit: 3749

a first wire 32 or 170 extending out of the terminal block lower part; and a second wire 170 or 32 extending out of the terminal block upper part wherein the wall extends from the terminal block such that the wall shields an exposed portion of the first wire and the second wire (please see column 7 lines 3-68 which is considered to disclose the claimed shielding feature). Hopkins is also considered to disclose the claimed feature wherein the wall covers a first connector coupling the terminal block lower part with a first power wire and a second connector coupling the terminal block upper part with a second power wire from a first side of the terminal block and a second

Art Unit: 3749

side of the terminal block (also at column 7 lines 3-68) and single body terminal block formation as shown in figure **18**.

#### Claim Rejections - 35 USC § 103

Claims 1 and 3 are rejected under 35 U.S.C. 103(a) as being unpatentable over McCormick (US 2,742,708). McCormick is considered to disclose the claimed invention comprising:

base 314 forming a floor;

a front cabinet 211 forming a front portion of the clothes dryer;

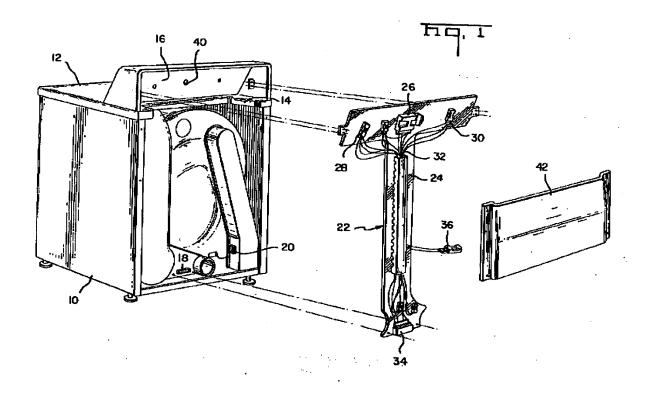

a side cabinet 218 forming a side portion of the clothes dryer;

a top cover **216** provided on a top surface of the front cabinet, the side cabinet and the back cover;

a control panel **217** provided on a rear portion of the top cover. McCormick is considered to disclose the claimed invention except for the claimed back cover forming a back side of the clothes dryer, terminal block provided on an inside of the control panel, a wall for shielding an exposed part of core wire extending from an upper front portion and lower front portion of the terminal block including a single body terminal block formation. Hopkins, another structure for a clothes dryer, is considered to disclose a back cover **42** in figure **1** (shown below),

Application/Control Number: 10/663,995

Art Unit: 3749

a wall for shielding an exposed part of core wire extending from an upper front portion, and lower front portion of the terminal block including a single body terminal block formation as discussed in the anticipatory rejection above. It would have been obvious to one skilled in the art to combine the teachings of McCormick with the back cover, wall for shielding an exposed part of core wire extending from an upper front portion, and lower front portion of the terminal block including a single body terminal block formation, considered disclosed in Hopkins, for the purpose of producing an improved completely hermaphroditic electrical contact terminal having an insulation displacing portion and an intermating portion adapted to engage a relatively wide range of related contacts.

Art Unit: 3749

Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over McCormick in view of Hopkins in further view of Sergeant et al. (US 4,820,189). McCormick in view of Hopkins is considered to disclose the claimed invention, as discussed above under the obviousness rejection, except for the claimed wall for shielding an exposed part of core wire covers a first connector connecting a lower part of the terminal block with a power cord wire and a second connector connecting an upper part of the terminal block with a power cord wire from a front portion of the terminal block and a side portion of the terminal block. Sergeant, another structure for a clothes dryer, is considered to disclose a wall for shielding an exposed part of core wire covers a first connector connecting a lower part of the terminal block with a power cord wire and a second connector connecting an upper part of the terminal block with a power cord wire from a front portion of the terminal block and a side portion of the terminal block at column 4 lines 1-12. It would have been obvious to one skilled in the art to combine the teachings of McCormick in view of Hopkins with the wall for shielding an exposed part of core wire covers a first connector connecting a lower part of the terminal block with a power cord wire and a second connector connecting an upper part of the terminal block with a power cord wire from a front portion of the terminal block and a side portion of the terminal block, considered disclosed in Sergeant, for the purpose of shielding a covered power cord wire.

#### Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Stephen Gravini whose telephone number is 571 272 4875. The examiner can normally be reached on normal weekday business hours (east coast time).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ira S. Lazarus can be reached on 571 272 4877. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
